Academic Education

2016 - 2019

Marketing Technological Graduation - Estácio de Sá (Finished)

Professional Experience

Oct 2021 - Current

[REMOTE] X-Team - Front End Developer

Allocated in Fox, I work in the development of new modules, using React, for the internal systems that they use for blockouts and airings management. I also work in the creation of new flows and screens for these modules, acting as a UI/UX Designer to help the team to build new modules that uses the same UX/UI, so even being micro frontends, for the final user the experience is the same.

Dec 2016 - Oct 2021

[REMOTE] SAI Global - Lead UI/UX Front End Developer

Develop new interfaces for the system known as GRC Digital Manager, using React/Redux as stack for the front end integrations and for the redesign of the system. Also, creation of Header and Menu using webcomponents for reusability across internal platforms using different stacks. Besides that, I've also developed many UI/UX flows and screens for the new system design using Photoshop/Invision for prototyping.

Sep 2016 - Oct 2017

B2W Digital - Front End Developer

Acting on the development of the new version of the platform used by Site Blindado, using HTML5, CSS3, React/Redux and Jest for tests.

Dec 2015 - Jul 2016

TO Brasil (Allocated at Tim Brasil) - Front End Developer

Integrate different systems into a single one, having the need to create a new layout and implement it. Using HTML5, CSS3 and jQuery, with notions in ASP and SQL Server. In the graphic area, use of Adobe Creative Cloud.

Sep 2013 - Oct 2015

Módulo GRC - UI Designer

I was involved as much with the graphic part as the Front End part of the systems used by the company. I made several icons and implemented many prototypes and wireframes. Use of HTML5, CSS3, Javascript and Adobe Creative Cloud package.
